

COURSE PRESENTATION

Digital Heritage Lab: Applied technologies for cultural heritage documentation

15-19 June 2026

TEACHER(S)

Francesco Fassi

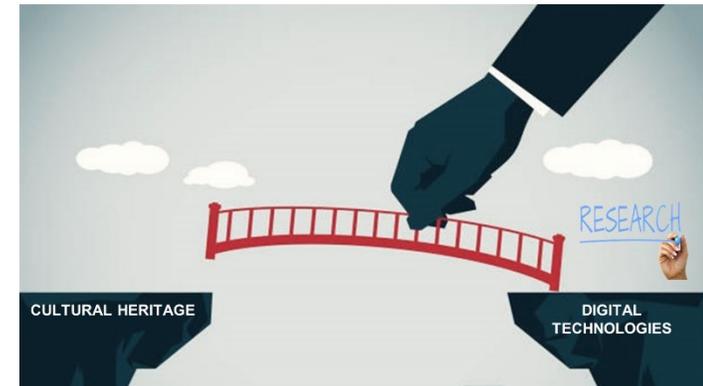

Cristiana Achille

Welcome to Digital Heritage Lab: Applied Technologies for Documenting Cultural Heritage!

This course offers a hands-on and engaging experience that bridges the gap between our rich cultural heritage and the frontiers of digital innovation.

Participants will step into the shoes of "curators of the future," learning cutting-edge methodologies for measuring, documenting, and enhancing Cultural Heritage.

The educational objectives aim to:

- Understand the transformative impact of digital technologies in the Cultural Heritage field.
- Acquire theoretical knowledge about the most modern survey techniques.
- Acquire practical ability to use specific instruments and software tools.
- Develop a concrete digital surveying project, from measuring an object to creating its digital copy.

...visit Milan Cathedral!

A visit to Milan Cathedral is planned to experience firsthand a small digitalization project and to understand the potential of modern equipment applied to a real-world case.

Digital Heritage Lab: last day...

On the afternoon of the last day, the groups will present the results of the activities done.
